I. IMPORTANT SAFETY INSTRUCTIONS

Please keep this manual with you at all times.

- It is important to read this entire manual before assembling and using the equipment. Safe and effective use can only be achieved if the equipment is assembled, maintained, and used properly. **PLEASE NOTE:** It is your responsibility to ensure that all users of the equipment are informed of all warnings and precautions.
- Before starting any exercise program you should consult your doctor to determine if you have any medical or physical conditions that could put your health and safety at risk, or prevent you from using the equipment properly. Your doctor's advice is essential if you are taking medication that affects your heart rate, blood pressure or cholesterol level.
- Be aware of your body's signals. Incorrect or excessive exercise can damage your health. Stop exercising if you experience any of the following symptoms: pain, tightness in your chest, irregular heartbeat, and extreme shortness of breath, lightheadedness, dizziness or feelings of nausea. If you do experience any of these symptoms, you should consult your doctor before continuing with your exercise program.
- Never drop the dumbbells on the ground as this will damage the product.
- Do not attempt to disassemble the dumbbell.
- Keep children and pets away from the equipment. This equipment is designed for adult use only.
- Ensure you have adequate space when using the dumbbells for your exercise training.
- Before using the equipment, check that the locking mechanism is functioning properly. Do not use the equipment until the problem has been rectified.
- Wear suitable clothing while using the equipment. Avoid wearing loose clothing that may get caught in the equipment or that may restrict or prevent movement.
- This equipment is designed for indoor and family use only.
- Care must be taken when lifting or moving the equipment so as not to injure your back.
- Always keep this instruction manual and assembly tools at hand for reference.
- The equipment is not suitable for commercial use.

II. DUMBBELL INFORMATION

The adjustable dumbbell has weight increments from 2.5kg to 24kg.

Please see the following chart which outlines the exact increments.

KG	2.5	3.5	4.5	5.5	6.5	8	9	10	11.5	13.5	16	18	20.5	22.5	24
LB	5	7.5	10	12.5	15	17.5	20	22.5	25	30	35	40	45	50	52.5

HOW TO USE:

1. Select the desired weight by turn the adjustment knob on each end. Ensure both ends are on the same value and aligned with the arrow in the middle.

2. Once the kg is selected on both ends, simply pull the handle straight up.

! PLEASE NOTE:

2.5kg is just the handle without the plates clicked in.

III. TROUBLESHOOTING

Problem: Adjustment knob will not turn while handle is in base.

Answer:

- a. Ensure the handle is fully depressed into the dumbbell bases. If not fully depressed, no locking mechanism will not be released.
- b. Check to see if any weight plates have been put into base backwards. All weight plates must have the selection tongue facing away from the grip of the handle.

Problem: Dumbbell handle does not insert into base when the plates are selected.

Answer:

- a. Make sure both adjustment knobs are set directly to 2.5kg or 5lb.
- b. Make sure all weight plates have the selection tongue facing away from dumbbell grip.

IV. EXERCISE GUIDE

! PLEASE NOTE:

Before beginning any exercise program, consult your physician. This is important especially if you are over the age of 45 or individuals with pre-existing health problems.

The pulse sensors are not medical devices. Various factors, including the user's movement, may affect the accuracy of heart rate readings. The pulse sensors are intended only as an exercise aid in determining heart rate trends in general.

Exercising is great way to control your weight, improving your fitness and reduce the effect of aging and stress. The key to success is to make exercise a regular and enjoyable part of your everyday life.

The condition of your heart and lungs and how efficient they are in delivering oxygen via your blood to your muscles is an important factor to your fitness. Your muscles use this oxygen to provide enough energy for daily activity. This is called aerobic activity. When you are fit, your heart will not have to work so hard. It will pump a lot fewer times per minute, reducing the wear and tear of your heart.

So as you can see, the fitter you are, the healthier and greater you will feel.

WARM UP

Start each workout with 5 to 10 minutes of stretching and some light exercises. A proper warm-up increases your body temperature, heart rate and circulation in preparation for exercise. Ease into your exercise.

After warming up, increase the intensity to your desired exercise program. Be sure to maintain your intensity for maximum performance. Breathe regularly and deeply as you exercise.

COOL DOWN

Finish each workout with a light jog or walk for at least 1 minute. Then complete 5 to 10 minutes of stretching to cool down. This will increase the flexibility of your muscles and will help prevent post-exercise problems.

WORKOUT GUIDELINES

! This is how your pulse should behave during general fitness exercise. Remember to warm up and cool down for a few minutes.

The most important factor here is the amount of effort you put in. The harder and longer you work, the more calories you will burn.

V. WARRANTY

AUSTRALIAN CONSUMER LAW

Many of our products come with a guarantee or warranty from the manufacturer. In addition, they come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage.

You are entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure. Full details of your consumer rights may be found at www.consumerlaw.gov.au.

Please visit our website to view our full warranty terms and conditions:
