1. IMPORTANT SAFETY INSTRUCTIONS

WARNING - Read all instructions before using this machine.

It is important your machine receives regular maintenance to prolong its useful life. Failing to regularly maintain your machine may void your warranty.

Please keep this manual with you at all times

- a. It is important to read this entire manual before assembling and using the equipment. Safe and effective use can only be achieved if the equipment is assembled, maintained and used properly.

Please note: It is your responsibility to ensure that all users of the equipment are informed of all warnings and precautions.

- b. Before starting any exercise program you should consult your doctor to determine if you have any medical or physical conditions that could put your health and safety at risk, or prevent you from using the equipment properly. Your doctor's advice is essential if you are taking medication that affects your heart rate, blood pressure or cholesterol level.
- c. Be aware of your body's signals. Incorrect or excessive exercise can damage your health. Stop exercising if you experience any of the following symptoms: pain, tightness in your chest, irregular heartbeat, and extreme shortness of breath, lightheadedness, dizziness or feelings of nausea. If you do experience any of these symptoms, you should consult your doctor before continuing with your exercise program.
- d. Keep children and pets away from the equipment. This equipment is designed for adult use only.
- e. Use the equipment on a solid, flat level surface with a protective cover for your floor or carpet. To ensure safety, the equipment should have at least 0.5 meters of free space all around it.
- f. Before using the equipment, check that the nuts and bolts are securely tightened. If you hear any unusual noises coming from the equipment during use and assemble, stop immediately. Do not use the equipment until the problem has been rectified.
- g. Wear suitable clothing while using the equipment. Avoid wearing loose clothing that may get caught in the equipment or that may restrict or prevent movement.
- h. This equipment is designed for indoor and family use only.

- i. Care must be taken when lifting or moving the equipment so as not to injure your back.
- j. Always keep this instruction manual and assembly tools at hand for quick reference.
- k. The equipment is not suitable for therapeutic use.
- l. There are many functions of the computer, which value will show when using the equipment according the amount of exercise, here warmly remind you that the value of heart pulse just give you some reference.

2. CARE INSTRUCTIONS

- a. Lubricate moving joints after periods of usage
- b. Be careful not to damage plastic or metal parts of the machine with heavy or sharp objects
- c. The machine can be kept clean by wiping it down using dry cloth
- d. All nuts and bolts are to be checked and tightened on a regular basis. This includes pedals and other moving parts. Failure to do so may cause damage to your thread and void your warranty.

Battery Usage

- a. Batteries are to be installed or replaced by adult only
- b. Do not use rechargeable batteries. Do not mix different battery types. Do not mix old and new batteries. Do not mix alkaline, standard (Carbon-Zinc), or rechargeable (Nickel-Cadmium) batteries
- c. Remove batteries when product is not in use
- d. Remove exhausted batteries from product and dispose of in accordance with the manufacturer's recommendation
- e. Do not attempt to recharge non-rechargeable batteries
- f. Batteries are to be inserted with correct polarity
- g. The supply terminals are not to be short-circuited

3. PARTS LIST

			
1.Main frame welding	2.Front feet tube welding	3.Rear feet tube	4.Armrest adjustment welding
			
5.Armrest welding	6.Seat lift adjust welding	7.Seat tube	8.Seat
			
9L.Pedal/9R.Pedal	10. Computer	22. Fixing knob M10	21.Open wrench
			
22.Cross L style wrench	13.Armrest cover	Adjustable knob M16	31Washer Φ 10.5* Φ 20
14.Carriage bolt M8*50	15.Dome nut M8	16.Washer Φ 8.5* Φ 16	17. Hexagon socket bolt M6
18. Washer Φ 6	19. Spring washer Φ 8	Left crank	Right crank

4. ASSEMBLY INSTRUCTIONS

STEP 1

- a) Secure the front stabilizer (2) to the Main Frame (1), using 2 sets carriage bolts (14), dome nuts (15) and washers (16).

STEP 2:

- a) Secure the rear stabilizer (3) to the Main Frame (1), using 2 sets carriage bolts (14), dome nuts (15) and washers (16).

STEP 3:

- a) Screw the Right Pedal (9R) into the crank shaft in the clockwise direction.
- b) Screw the Left Pedal (9L) into the crank shaft in the anti-clockwise direction. You must use a spanner to tighten securely.

STEP 4:

- a) Loosen the adjustable knob and insert Seat Post (6) into the Main Frame (1). Then align the holes and tighten the fixing knob.

STEP 5:

- a) Put the Seat Slider (7) into the Seat Post (6). The bolt which is welded on the Bar (7) must be placed into the slot of the Seat (6). Then tighten it with the Fixing Knob (22).

STEP 6:

- a) Slide the Seat (8) onto the rod of the Seat Bar (7). Then tighten the two nuts under the Seat (8) securely.

STEP 7:

- a) Loosen the Adjustable Knob and insert the Handlebar Stem (5) into the Main Frame (1).
- b) Align the hole to the Adjustable Knob, then secure the Adjustable Knob.

STEP 8:

- a) Put the Handlebar (5) onto the Handlebar Stem (4) and make the holes aligned completely. Tighten them with 4 sets Hexagon Socket Bolts (17), Spring Washers (19), and Washers (18) securely.

STEP 9:

- a) Slide the Computer (10) into the Handlebar (5) along the bulge on Handlebar (5). Then plug the Sensor Connector (20) into the Connector of the Computer (10).

5. ADJUSTMENT INSTRUCTIONS

Vertical Seat Adjustment

To adjust the seat height, slacken the spring knob on the vertical post stem on the main frame and pull back the knob. Position the vertical seat post for the desired height so that holes are aligned, then release the knob and retighten it.

Horizontal Seat Adjustment

To move the seat forward in the direction of the handlebar or backwards away from it, loosen the adjusting knob and washer and pull the knob back. Slide horizontal seat post into desired position. Align holes and then retighten the adjusting knob.

Handlebar Height

To adjust the handlebar height, slacken the spring knob and secondary knob and pull both knobs back. Slide the handlebar post along the housing on the main frame to the desired height and, with the holes aligned correctly, tighten the spring adjusting knob and then the secondary knob.

6. COMPUTER OPERATION

FUNCTIONAL BUTTONS:

MODE – Press it to select functions.

– Hold it for 3 seconds to reset time, distance and calories.

FUNCTIONS:

1. **SCAN:** Press MODE button until “▲” appears at SCAN Position (or until “SCAN” appears), computer will rotate through all the 4 functions: Time, Speed, Distance, and Calorie. Each display will be hold for 6 seconds.
2. **TIME:** Count the total time from exercise start to end.
3. **SPEED:** Display current speed.
4. **DIST:** Count the distance from exercise start to end.
5. **CALORIES (CAL):** Count the total calories from exercise start to the end.
6. **ODOMETER:** Count the total accumulated distance will be shown

SPECIFICATIONS:

FUNCTIONS	Auto Scan	Every 6 Seconds
	Running Time	00:00 ~ 99:59(Minute: Second)
	Current Speed	The max pick-up signal is 99.9KM/H or 99.9M/H
	Trip Distance	0.00 ~ 99.99 KM or MILE
	Calories	0.0 ~ 999.9 Kcal
Battery Type	2 pcs of SIZE-AAA	
Operating Temperature	0°C ~ +40°C(32°F ~ 104°F)	
Storage Temperature	-10°C ~ +60°C(14°F ~ 140°F)	

7. EXERCISE GUIDE

PLEASE NOTE: Before beginning any exercise program, consult your physician. This is important especially if you are over the age of 45 or individuals with pre-existing health problems.

The pulse sensors are not medical devices. Various factors, including the user's movement, may affect the accuracy of heart rate readings. The pulse sensors are intended only as an exercise aid in determining heart rate trends in general.

Exercising is a great way to control your weight, improve your fitness and reduce the effect of aging and stress.

The key to success is to make exercise a regular and enjoyable part of your everyday life.

The condition of your heart and lungs and how efficient they are in delivering oxygen via your blood to your muscles is an important factor to your fitness. Your muscles use this oxygen to provide enough energy for daily activity. This is called aerobic activity. When you are fit, your heart will not have to work so hard. It will pump a lot fewer times per minute, reducing the wear and tear of your heart.

So as you can see, the fitter you are, the healthier and greater you will feel.

Warm-up

Start each workout with 5 to 10 minutes of stretching and some light exercises. A proper warm-up increases your body temperature, heart rate and circulation in preparation for exercise. Ease into your exercise.

Training Zone Exercise

After warming up, increase the intensity to your desired exercise program. Be sure to maintain your intensity for maximum performance. Breathe regularly and deeply as you exercise-never hold your breath.

Cool Down

Finish each workout with a light jog or walk for at least 1 minute. Then complete 5 to 10 minutes of stretching to cool down. This will increase the flexibility of your muscles and will help prevent post-exercise problems.

Workout Guidelines

TARGET ZONE

THIS IS HOW YOUR PULSE SHOULD BEHAVE DURING GENERAL FITNESS EXERCISE.

REMEMBER TO WARM UP AND COOL DOWN FOR A FEW MINUTES.

The most important factor here is the amount of effort you put in. The harder and longer you work, the more calories you will burn. Effectively this is the same as if you were training to improve your fitness, the difference is the goal.

8. WARRANTY

AUSTRALIAN CONSUMER LAW

Many of our products come with a guarantee or warranty from the manufacturer. In addition, they come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage.

You are entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure. Full details of your consumer rights may be found at www.consumerlaw.gov.au

Please visit our website to view our full warranty terms and conditions:

Hand Pulse Technology

This product comes equipped with hand pulse sensors which are used to pick up tiny EKG/ECG signals that run through the body when your heart beats. These electrical EKG/ECG signals are very small and that they must be amplified 1000 times to make the signal useful for the computer to display your pulse.

To ensure proper operation:

- The user must maintain good, consistent contact on all four sensors
- The users skin cannot be too dry or too wet

Other factors that could affect the reading:

- Change of grip on the sensors (during slow pace walking and up to running)
- Tightening of hand muscles will produce small electrical signals
- Static electricity charges from the air or from walking on the treadmill

EKG/ECG Sensors may filter through actual EKG/ECG signals and “Noise” factors that may affect the reading. This will cause the pulse reading to be delayed and will take longer to update the display as the heart rate changes. Too much noise will create an incorrect reading. Medical conditions or having no electrical signal in the hands are other factors that may affect pulse readings as well.

These are limitations of hand pulse technology and even the most expensive systems (which can cost upwards of \$3,000) used in hospitals have the same problems. The difference is that a patient in a hospital is not running on a treadmill. Hand pulse technology works well on stationary exercise machines like bikes and even elliptical cross trainers but are not perfect on a treadmill. We offer treadmills with a wireless heart rate receiver which may be a more accurate option.

To test if your hand pulse sensors are working up to specification, hold them while standing on the side step rails, not walking, and see if the reading is more in line with what you would expect. This will eliminate the movement and static electricity factors. If your hands are dry, then wet them slightly (saliva works as a great conductor if this doesn't bother you).
